We ship Standard UPS Ground. Call to request faster delivery.

VIDEO HIGHLIGHTS

AIRBAGS: Dramatic sequences of airbag deployment with a rear facing infant dummy in the front passenger seat are shown in real time and in slow motion. These tests leave no doubt to the life-threatening danger that airbags pose to infants and older children.

REAR-FACING: Crash footage illustrates the importance of infants and toddlers to age 2-3, riding rear-facing. Forward facing too soon can lead to spinal cord injury in a crash.

BOOSTER SEATS: A crash test shows the benefits of using a "belt positioning" booster for achieving correct belt fit.

LATCH: The universal attachment system named LATCH (Lower Anchors and Tethers for Children) is demonstrated.

CPSTs: Certified Passenger Safety Technicians show the installation and proper use of car seats through all stages of protection from infant to age 10+.
